Volume 104 (2) 1988

ESSAY IN DEVELOPMENT

- Tomlinson, A.**
Cellular interactions in the developing
Drosophila eye 183

CONTRIBUTED PAPERS

- Komaki, M. K., Okada, K., Nishino, E.
and Shimura, Y.**
Isolation and characterization of novel mutants
of *Arabidopsis thaliana* defective in flower
development 195

- Mackey, H. M., Payette, R. F.
and Gershon, M. D.**
Tissue effects on the expression of serotonin,
tyrosine hydroxylase and GABA in cultures of
neurogenic cells from the neuraxis and branchial
arches 205

- Emerson, J. A.**
Disruption of the cytokeratin filament network
in the preimplantation mouse embryo 219

- Collick, A., Reik, W., Barton, S. C.
and Surani, M. A. H.**
CpG methylation of an X-linked transgene is
determined by somatic events postfertilization
and not germline imprinting 235

- Fasano, L. and Kerridge, S.**
Monitoring positional information during
oogenesis in adult *Drosophila* 245

- Harrison, L. G., Graham, K. T.
and Lakowski, B. C.**
Calcium localization during *Acetabularia* whorl
formation: evidence supporting a two-stage
hierarchical mechanism 255

- Lehnert, S. A. and Akhurst, R. J.**
Embryonic expression pattern of TGF beta
type-1 RNA suggests both paracrine and
autocrine mechanisms of action 263

- McRobbie, S. J., Jermyn, K. A., Duffy, K.,
Blight, K. and Williams, J. G.**
Two DIF-inducible, prestalk-specific mRNAs of
Dictyostelium encode extracellular matrix
proteins of the slug 275

- Copp, A. J., Brook, F. A. and Roberts, H. J.**
A cell-type-specific abnormality of cell
proliferation in mutant (curly tail) mouse
embryos developing spinal neural tube defects 285

- Copp, A. J., Crolla, J. A. and Brook, F. A.**
Prevention of spinal neural tube defects in the
mouse embryo by growth retardation during
neurulation 297

- Davidson, D., Graham, E., Sime, C.
and Hill, R.**
A gene with sequence similarity to *Drosophila*
engrailed is expressed during the development of
the neural tube and vertebrae in the mouse 305

- Becker, D. L. and Cook, J. E.**
Divergent axon collaterals in the regenerating
goldfish optic tract: a fluorescence double-label
study 317

- Cook, J. E. and Becker, D. L.**
Retinotopic refinement of the regenerating
goldfish optic tract is not linked to activity-
dependent refinement of the retinotectal map 321

- Primmatt, D. R. N., Stern, C. D.
and Keynes, R. J.**
Heat shock causes repeated segmental
anomalies in the chick embryo 331
