Contents

Volume 101 (4) 1987

GENERAL INTEREST PAPER
Gerhart, J. C.
The epigenetic nature of vertebrate development: an interview of Pieter D. Nieuwkoop on the occasion of his 70th birthday

CONTRIBUTED PAPERS
McCarthy, R. A. and Burger, M. M.
In vivo embryonic expression of laminin and its involvement in cell shape change in the sea urchin Sphaerechinus granularis

Merrifield, P. A. and Konigsberg, I. R.
Nerve-dependent accumulation of myosin light chain 3 in developing limb musculature

Walter, J., Kern-Veils, B., Huf, J., Stolze, B. and Bonhoeffer, F.
Recognition of position-specific properties of tectal cell membranes by retinal axons in vitro

Godement, P., Vanselow, J., Thanos, S. and Bonhoeffer, F.
A study in developing visual systems with a new method of staining neurones and their processes in fixed tissue

Abbadie, C., Boucher, D., Charlemagne, J. and Lacroix, J. C.
Immunolocalization of three oocyte nuclear proteins during oogenesis and embryogenesis in Pleurodeles

Crittenden, S. L., Pratt, R. S., Cook, J. H., Balsamo, J. and Lilien, J.
Immunologically unique and common domains within a family of proteins related to the retina Ca2+-dependent cell adhesion molecule. NcalCAM

Crawford, D. R. and Richter, J. D.
An RNA-binding protein from Xenopus oocytes is associated with specific message sequences

Tomlinson, C. R., Beach, R. L. and Jeffery, W. R.
Differential expression of a muscle actin gene in muscle cell lineages of ascidian embryos

Maxwell, G. D. and Forbes, M. E.
Exogenous basement-membrane-like matrix stimulates adrenergic development in avian neural crest cultures

Tesařík, J., Kopečný, V., Plachot, M. and Mandelbaum, J.
High-resolution autoradiographic localization of DNA-containing sites and RNA synthesis in developing nuclei of human preimplantation embryos: a new concept of embryonic nucleogenesis

Schofield, P. N. and Tate, V. E.
Regulation of human IGF-II transcription in fetal and adult tissues

Cirotto, C., Panara, F. and Arangi, I.
The minor haemoglobins of primitive and definitive erythrocytes of the chicken embryo. Evidence for haemoglobin L

Walmsley, M. E. and Patient, R. K.
Highly efficient β globin transcription in the absence of both a viral enhancer and erythroid factors

Dreyer, C.
Differential accumulation of oocyte nuclear proteins by embryonic nuclei of Xenopus

pp60csrc expression in transdifferentiating cultures of embryonic chick neural retina cells

Guillery, R. W., Jeffery, G. and Cattanach, B. M.
Abnormally high variability in the uncrossed retinofugal pathway of mice with albino mosaicism

Straznicky, C. and McCart, R.
The effects of tectal lesion on the survival of isthmic neurones in Xenopus

Taylor, K. D. and Pikó, L.
Patterns of mRNA prevalence and expression of B1 and B2 transcripts in early mouse embryos

Cooke, J., Smith, J. C., Smith, E. J. and Yaqoob, M.
The organization of mesodermal pattern in Xenopus laevis: experiments using a Xenopus mesoderm-inducing factor

Walter, J., Henke-Fahle, S. and Bonhoeffer, F.
Avoidance of posterior tectal membranes by temporal retinal axons

Howlett, S. K., Barton, S. C. and Surani, M. A.
Nuclear cytoplasmic interactions following nuclear transplantation in mouse embryos

Woodland, H. R. and Jones, E. A.
The development of an assay to detect mRNAs that affect early development

Bownes, M., Scott, A. and Blair, M.
The use of an inhibitor of protein synthesis to investigate the roles of ecdysteroids and sex-determination genes on the expression of the genes encoding the Drosophila yolk proteins
