Please note that, from October 1988, correspondence and manuscripts for Chris Wylie should be sent to the Development Editorial Office (Department of Zoology, University of Cambridge, Downing Street, Cambridge CB2 3EJ).

Cover photograph

Theoretical aspects of stripe formation in relation to Drosophila segmentation by T. C. Lacalli, D. A. Wilkinson and L. G. Harrison. Colour version of Fig. 3 on page 110 of this issue.
Word-processor disks

If your manuscript was prepared on a word processor there is a high probability that we can use the floppy disk for typesetting. This gives us a substantial decrease in typesetting time and assures you that there are no re-keying errors in your article. Using word-processor disks helps us to shorten publication times.

If you use a word processor and would be willing to lend us the disk, please give whoever is preparing your manuscript the following instructions, so that we can make the best use of your disk:

1. Follow the general instructions about style given in the Information for Contributors in the Journal.

2. When you create and/or edit your manuscript, please use the document mode (or equivalent) in the word-processor program.

3. Where possible, please:
   - Do not split the article into small files on the disk; if possible keep all of the article in one file.
   - Do not put more than one article in a file: it is difficult to separate the articles.
   - Do not give the file a name which is longer than 8 characters.
   - Do not justify the right-hand margin; this often produces ‘discretionary’ or ‘soft’ hyphens, which are not required.
   - Do not use a set left-hand margin throughout the manuscript.
   - Do not use footnotes.
   - Do leave a blank line before and after all headings.
   - Do use paragraph indents.
   - If possible use your word-processor facilities: underlining bold, superscripts and subscripts where required.
   - If possible distinguish the numerals zero and one from the letters O and I.
   - Do type main headings in capital letters (e.g. RESULTS).
   - Do type subheadings in bold (e.g. subheading).
   - Do type sub-subheadings with underlining (e.g. underline).

4. If your word processor or printer has any special characters, e.g. à ù â é ô à oo ç β μ √ ± °C × α δ ∆ please use them consistently throughout the text. Please make a list of such special characters used and how you obtain them (i.e. dedicated key pressed or printer control codes used directly), and send this to us with the disk.

5. Please ensure that the disk sent to us is the final corrected version of the article that exactly matches the final manuscript.

6. Send us a complete final corrected version of the manuscript, as well as the disk. NB: only send the disk containing the manuscript, not the word-processor program.

7. Label the disk with: (a) your name; (b) the word processor/computer used, e.g. Osborne 1; (c) the printer used, e.g. LaserWriter; (d) the name of the program, e.g. Wordstar.

The disk will be returned to you with your manuscript.

Telephone: (0223) 311789
The aim of DEVELOPMENT is to act as a forum for all research that offers a genuine insight into mechanisms of development. Manuscripts will be considered primarily for free distribution only: they must not be sold.

Studies on both plant and animal development are welcome and can be focused upon any aspect of the developmental process, at all levels of biological organization from the molecular and cellular to the tissue levels.

Manuscripts can be of any length. Since publication time is short, there is no separate section dealing with short or rapid publications. Authors are asked to ensure that very short papers are nonetheless complete pieces of work. Publication of a paper in this journal implies that authors make available specialized reagents (for example antibodies, DNA probes) to other scientists in the field who require them for bona fide purposes.

For detailed instructions to authors, please see opposite.

Subscription rates
DEVELOPMENT in 1988 will have 12 normal issues and 2 casebound supplements. The 12 normal issues will be in the form of 3 volumes (102, 103, 104) each of 4 parts. In 1988 the Supplements will be Craniofacial Development, edited by Peter Thorogood & Cheryl Tickle, and Mechanisms of Segmentation edited by Vernon French, Phil Ingham and Jonathan Cooke. The prices for 1988 are £280.00 (UK) US$620.00 (USA and Canada) £355.00 (Japan) £325.00 (Rest of World). There are reduced subscriptions for members of the BSCB, BSDB and SEB (£40, $85) and for individual use only (£55, $90). These prices include postage and packing. Orders for 1988, which can be in £ Sterling/Dollars or Access-/Visa credit cards, should be sent to The Biochemical Society Book Depot, PO Box 32, Commerce Way, Colchester, CO2 8HP, UK or to your normal agent or bookseller. Orders must be accompanied by payment. Copies of the journal for subscribers in the USA and Canada are sent by air to New Jersey for delivery with the minimum delay (second class postage paid at Rahway, NJ and at additional mailing offices).

Postmaster (USA mailing only)
Send address corrections to Development, c/o Mercury Airfreight International Inc., 2323 Randolph Avenue, Avenel, New Jersey 07001, USA (US Mailing Agent).

Back volumes
Please contact The Biochemical Society Book Depot (see above) for prices.

Copyright and reproduction
1. Authors may make copies of their own papers in this journal without seeking permission from The Company of Biologists Limited, provided that such copies are for free distribution only: they must not be sold.
2. Authors may re-use their own illustrations in other publications appearing under their own name, without seeking permission.
3. For all other matters relating to the reproduction of copyright material written application must be made to Dr R. J. Skaer, Company Secretary, The Company of Biologists Limited, Department of Zoology, Downing Street, Cambridge CB2 3EJ, UK.
4. ISI Tear Service, 3501 Market Street, Philadelphia, 19104, USA is authorized to supply single copies of separate articles for private use only.
5. Specific permission will not be required for photocopying copyright material in the following circumstances.
   (1) For private study, provided the copying is done by the person requiring its use, or by an employee of the institution to which he/she belongs, without charge beyond the actual cost of copying.
   (2) For the production of multiple copies of such material, to be used for bona fide educational purposes, provided this is done by a member of the staff of the university, school or other comparable institution, for distribution without profit to student members of that institution, provided the copy is made from the original journal.

The Company of Biologists Limited, founded in 1925, is a 'Company Limited by Guarantee' having tax-exempt charitable status. There is a Board of Directors consisting of about 20 professional biologists, two of them appointed annually by the Society for Experimental Biology, who receive no salary or fees for their services. The Company's main function is to own and produce the Journal of Experimental Biology, the Journal of Cell Science and Development, and to appoint the Editors of these journals. These are part-time appointments held by established professional biologists of some eminence, and once they have been appointed the Company exercises no control over editorial policy.

The Company is precluded by its charitable status from making a commercial profit on its operations, and its aim is to produce high-quality journals at the lowest possible price. Any surplus on publishing not required for the journals' reserves is transferred to an Educational Trust Fund, which makes substantial grants in aid of societies concerned with the fields of interest covered by the Company's journals. Grants are also made to conferences and summer schools in the fields of its journals.

The Company's independence of commercial publishers enables it to choose the most effective form of publishing to give papers accepted the widest possible circulation in journals of high quality and prestige. Changes in production and distribution of the journals have resulted in significant increases in the speed of publication, and the time between the acceptance of a paper and its publication is now about 13 weeks.

Information for contributors

1 Manuscripts can be sent to any editor or to The Editorial Office, DEVELOPMENT, Dept of Zoology, Downing St, Cambridge CB2 3EJ, UK. USA papers should be sent direct to one of the USA editors: Dr D. Melton, Department of Biochemistry and Molecular Biology, Harvard University, 7 Divinity Avenue, Cambridge, MA 02138, USA or Dr R. O. Hynes, Center for Cancer Research, Department of Biology, Massachusetts Institute of Technology, Cambridge, MA 02139, USA.

2 Manuscripts should be in English and as concise as possible. They should be typewritten, double spaced, on one side of the paper, and the pages numbered. Papers should be fully ready for press, since revision in proof will not be possible. The author is requested to provide three copies of the typescript and figures, and should keep a copy.

3 DEVELOPMENT can use author’s word-processor disks for setting accepted articles. If available please send a copy of the disk plus details of the word processor and program used with your final revised manuscript. Disks will be returned after use. Please see detailed instructions on next page.

4 A short title of not more than 40 characters, for use as page headings, should be supplied and at least 3 key words for indexing papers.

5 A summary must be provided at the beginning of the text. It should not exceed 500 words. Authors whose language is other than English may provide a translation of the summary into their own language. Acknowledgements should be placed before the list of references.

6 The list of references must be given in alphabetical order of author’s names. The titles of journals should be abbreviated in accordance with the World List of Scientific Periodicals, 4th edn (1963). The following style is used:

Citations in the text are given in the following form: Jones & Smith (1960) or (Jones & Smith, 1960). Where there are more than two authors citations should be in the form (Jones et al. 1960). Where more than one paper by the same author(s) have been published in the same year they are cited as Jones (1960a), Jones (1960b) etc.

7 Footnotes should be avoided wherever possible.

8 SI units should be used throughout in preparation of manuscripts.

9 Tables should be in typescript on separate sheets, and numbered. Authors should indicate the places for their insertion in the margin of the typescript.

10 Text figures and photographs should be numbered in a single series, in the order in which they are referred to in the text. Authors should submit the original of each illustration and two copies for reviewers. If copies of photographic plates are sent, they must be of suitable standard for reviewers to judge the quality of the work; photocopies are not acceptable. Text figures should be drawn about twice final size. Photographs should be submitted the same size as they are to appear. Lettering on plates will be inserted by the printers and should be indicated either on a duplicate, marked set of prints or on a tracing-paper overlay bearing accurately marked outlines of the objects indicated. Each illustration should have the name of the author and the figure number written on the back, together with indication of orientation and any proposed reduction in size. The maximum printed size for illustrations is 210 mm × 168 mm for a whole page or 210 mm × 81 mm for a single column. Magnification should be indicated, when relevant, by a scale line on or beside the illustration. Illustrations should be referred to in the text as ‘Fig. 1’ etc. The places for insertion into the text should be indicated in the margin of the typescript. Legends for all illustrations should be typed together, separately from the main text.

11 Colour plates can be reproduced free of charge at the discretion of the editor. Any charge for excessive use of colour will also be at the editor’s discretion.

12 Authors will receive two sets of proofs, one for correction and return to Editorial Office. Authors may be required to pay for alterations in proof other than those needed to correct printer’s errors.

13 Authors will receive 200 offprints free of charge and may order additional copies when proofs are returned.

14 In order to give The Company of Biologists Limited authority to deal with matters of copyright, authors will be required to assign to them the copyright of any article published in the journal.
