Keep up to date with BioEssays

Published monthly, BioEssays covers advances in the fields of molecular, cellular and developmental biology. The journal is short, sharp and full of up to date reviews and discussions on new ideas and discoveries.

To subscribe, complete and mail the coupon or fax to one of the numbers below.

**BioEssays**

BioEssays is published for the ICSU Press by The Company of Biologists • Cambridge • England

---

**SUBSCRIPTION ORDER FORM:**

I would like to subscribe to BioEssays for 1991 (please tick appropriate box).

**LIBRARY/INSTITUTIONAL SUBSCRIPTION**

USA: $110  Rest of World: £110

**INDIVIDUAL SUBSCRIPTION** (prepayment required)

USA: $70  Rest of World: £44

A discount on subscriptions is offered to members of certain societies. Please contact your society if it has made arrangements of this sort.

All orders to:
The Company of Biologists Limited, Bidder Building, 140 Cowley Road, Cambridge CB4 4DZ, UK.

Tel: Cambridge (0223) 420482

---

**METHODS OF PAYMENT:**

Librarians/institutions: Please invoice.

Name: ____________________________

Order no: ____________________________

**Cheque/Money order payable to:** The Company of Biologists Limited

I undertake not to pass on any copy purchased at the individual rate, to a library.

BRITISH SOCIETY FOR DEVELOPMENTAL BIOLOGY
and
THE GENETICAL SOCIETY

AUTUMN MEETING
18TH-19TH SEPTEMBER 1991
UNIVERSITY OF LANCASTER

GENETIC AND DEVELOPMENTAL CONSEQUENCES
OF INSERTIONAL MUTAGENESIS

SPEAKERS
E. Coen (John Innes Institute)
G. Coupland (AFRC IPSR Cambridge)
C. Dean (Sainsbury Laboratory)
K. Feldman (University of Arizona)
J. Jones (Sainsbury Laboratory)
C. O'Kane (Warwick),
M. Krasnow (Stanford)
K. O'Hare (Imperial College)
K. Kaiser (Glasgow)
R. Beddington (Edinburgh)
D. Melton (Edinburgh)
F. Grosveld (NIMR London)
J. Mullins (Edinburgh)

Travel Funds:
Junior members of the BSDB may apply for contributions towards
the cost of attending the meeting from the Treasurer of the Society

FURTHER INFORMATION AND BOOKING FORMS:
Alan Shirras
Institute of Environmental and Biological Sciences
University of Lancaster
Lancaster LA1 4YQ
**INFORMATION FOR CONTRIBUTORS**

### Manuscripts
Send to: **Development Editorial Office**, Dept of Zoology, University of Cambridge, Downing St, Cambridge CB2 3EJ, UK. Tel: (0223) 311789 or direct to one of the editors.

USA papers should be sent direct to:
**Dr D. Melton**, Department of Biochemistry and Molecular Biology, Harvard University, 7 Divinity Avenue, Cambridge, MA 02138, USA,
**Dr G. Rubin**, Department of Molecular and Cell Biology, Box 539, LSA Building, University of California, Berkeley, CA 94720, USA,
or **Dr T. Jessell**, Center for Neurobiology and Behavior, Columbia University, 722 West 168th Street, New York, NY 10032, USA.

European papers can be sent to:
**Dr W. J. Gehring**, Department of Cell Biology, Biozentrum, University of Basel, Klingelbergstrasse 70, CH-4056, Basel, Switzerland.

Authors will receive two sets of proofs, one for correction and return to Editorial Office. Authors may be required to pay for alterations in proof other than those needed to correct printer's errors.

### Layout and style
A short title of not more than 40 characters, for use as page headings, should be supplied and at least 3 key words for indexing papers.

A summary must be provided at the beginning of the text. It should not exceed 500 words. Acknowledgements should be placed before the list of references.

The list of references must be given in alphabetical order of author's names. The titles of journals should be abbreviated in accordance with the World List of Scientific Periodicals, 4th edn (1963). The following style is used:

Citations in the text are given in the following form: Jones and Smith (1960) or (Jones and Smith, 1960). Where there are more than two authors citations should be in the form Jones et al. (1960). Where more than one paper by the same author(s) have been published in the same year they are cited as Jones (1960a), Jones (1960b) etc.

Footnotes should be avoided wherever possible.

### Tables
Please submit on separate sheets together with their titles and legends.

### Proofs
Authors will receive two sets of proofs, one for correction and return to Editorial Office. Authors may be required to pay for alterations in proof other than those needed to correct printer's errors.

### Text figures/photographs
These should be numbered in a single series (Fig. 1, Figs 2, 3 etc), in the order in which they are referred to in the text. Legends for all illustrations should be typed together, separately from the main text. Authors should submit three copies for reviewers.

Copies of the photographic plates must be of suitable standard for reviewers to judge the quality of the work; photocopies are not acceptable.

Original figures should be kept by the author until the manuscript has been accepted for publication.

Text figures and photographs ideally should be at final size and occupy either 1 or 2 columns. The maximum printed size for illustrations is 210 mm x 168 mm for a whole page or 210 mm x 81 mm for a single column. Labelling can be inserted by the author providing that the lattering conforms to journal style and size. Otherwise labelling should be indicated on a duplicate marked set of prints or on a tracing-paper overlay bearing accurately marked outlines of the objects indicated. Figure parts should be labelled in upper case and lettering on the plates should be in lower case. Magnification should be indicated, where relevant, by a scale line on or beside the illustration. Each illustration should have the name of the author and the figure number written on the back, together with indication of orientation and any proposed reduction in size.

### Colour plates
These can be reproduced free of charge at the discretion of the editor. Any charge for excessive use of colour will also be at the editor’s discretion.

### Copyright
In order to give The Company of Biologists Limited authority to deal with matters of copyright, authors will be required to assign to them the copyright of any article published in the journal.
Contents
Volume 112 (3) 1991

ESSAY IN DEVELOPMENT
Gradient fields and homeobox genes 669

CONTRIBUTED PAPERS
Lehmann, R. and Nüsslein-Volhard, C.
The maternal gene nanos has a central role in posterior pattern formation of the Drosophila embryo 679

McCaffery, P., Tempst, P., Lara, G. and Dräger, U. C.
Aldehyde dehydrogenase is a positional marker in the retina 693

Heberlein, U., Mlodzik, M. and Rubin, G. M.
Cell-fate determination in the developing Drosophila eye: role of the rough gene 703

Schoenwolf, G. C. and Alvarez, I. S.
Specification of neurepithelium and surface epithelium in avian transplantation chimeras 713

Wilson, S. W. and Easter Jr., S. S.
Stereotyped pathway selection by growth cones of early epiphysial neurons in the embryonic zebrafish 723

Sato, S. M. and Sargent, T. D.
Localized and inducible expression of Xenopus-posterior (Xpo), a novel gene active in early frog embryos, encoding a protein with a 'CCHC' finger domain 747

Bate, M. and Martinez Arias, A.
The embryonic origin of imaginal discs in Drosophila 755

Perotto, S., Vandenbosch, K. A., Butcher, G. W. and Brewin, N. J.
Molecular composition and development of the plant glycocalyx associated with the peribacteroid membrane of pea root nodules 763

Sweeton, D., Parks, S., Costa, M. and Wieschaus, E.
Gastrulation in Drosophila: the formation of the ventral furrow and posterior midgut invaginations 775

Mackem, S. and Mahon, K. A.
Ghox 4.7: a chick homeobox gene expressed primarily in limb buds with limb-type differences in expression 791

Schughart, K., Bieberich, C. J., Eid, R. and Ruddle, F. H.
A regulatory region from the mouse Hox-2.2 promoter directs gene expression into developing limbs 807

Rodriguez-Tébar, A. and Rohrer, H.
Retinoic acid induces NGF-dependent survival response and high-affinity NGF receptors in immature chick sympathetic neurons 813

Hatta, K., BreMiller, R., Westerfield, M. and Kimmel, C. B.
Diversity of expression of engrailed-like antigens in zebrafish 821

Serras, F. and Speksnijder, J. E.
F-actin localization during trochoblast differentiation in Patella vulgata embryos 833

Wei, L.-N., Chen, G.-J., Chu, Y.-S., Tsao, J.-L. and Nguyen-Huu, M. C.
A 3 kb sequence from the mouse cellular retinoic-acid-binding protein gene upstream region mediates spatial and temporal LacZ expression in transgenic mouse embryos 847

Nogawa, H. and Takahashi, Y.
Substitution for mesenchyme by basement-membrane-like substratum and epidermal growth factor in inducing branching morphogenesis of mouse salivary epithelium 855

Schedin, P., Hunter, C. P. and Wood, W. B.
Autonomy and nonautonomy of sex determination in triploid intersex mosaics of C. elegans 863

Khaner, O. and Wilt, F.
Interactions of different vegetal cells with mesomeres during early stages of sea urchin development 881

Irish, E. E. and Nelson, T. M.
Identification of multiple stages in the conversion of maize meristems from vegetative to floral development 891

The Company of Biologists Limited, Department of Zoology, University of Cambridge, Downing Street, Cambridge CB2 3EJ
