The Company of Biologists Limited, founded in 1925, is a 'Company Limited by Guarantee' having tax-exempt charitable status. There is a Board of Directors consisting of about 20 professional biologists, two of them appointed annually by the Society for Experimental Biology, who receive no salary or fees for their services. The Company's main function is to own and produce The Journal of Experimental Biology, the Journal of Cell Science and Development, and to appoint the Editors of these journals. These are part-time appointments held by established professional biologists of some eminence, and once they have been appointed the Company exercises no control over editorial policy.

The Company is precluded by its charitable status from making a commercial profit on its operations, and its aim is to produce high-quality journals at the lowest possible price. Any surplus on publishing not required for the journals' reserves is transferred to an Educational Trust Fund, which makes substantial grants in aid of societies concerned with the fields of interest covered by the Company's journals. Grants are also made to conferences and summer schools in the fields of its journals.

We apologize for the incorrect labelling of Fig. 5 in the article by R. E. Boswell, M. E. Prout and J. C. Steichen entitled Mutations in a newly identified Drosophila melanogaster gene, mago nashi, disrupt germ cell formation and result in the formation of mirror-image symmetrical double abdomen embryos Development 113, 373–384 (1991). A correct version of the figure is printed below with its legend.

![Erratum Figure](image.png)

**Erratum**

Fig. 5. The temperature-sensitive period for embryonic lethality of mago². Each measurement represents the inviability of embryos collected from hemizygous mago² mothers, during an 8h interval (see Experimental Procedures for details). Each time point represents the analysis of the viability of 200 to 1000 embryos. The top abscissa represents the oogenetic stages, as defined by King (King, 1970). The bottom abscissa depicts the developmental times, at 17°C (top) and 25°C (bottom), and the arrow indicates egg deposition. Thus, the negative times represent time during oogenesis prior to oviposition. The 17°C and 25°C time scales have been normalized according to Suzuki (1970) and the oogenetic stages were determined as described by David and Merle (1968).

INFORMATION ABOUT THE JOURNAL

DEVELOPMENT (ISSN 0950-1991) is a continuation of Journal of Embryology and Experimental Morphology (ISSN 0022-0752).

Development
The aim of Development is to act as a forum for all research that offers a genuine insight into mechanisms of development. Manuscripts will be considered primarily with respect to this aim.
Studies on both plant and animal development are welcome and can be focused upon any aspect of the developmental process, at all levels of biological organization from the molecular and cellular to the tissue levels.

What Development offers
(i) Wide international circulation
(ii) Fast publication – average 13 weeks from acceptance
(iii) Fast editorial processing
(iv) No page charges
(v) 200 free reprints
(vi) Free colour reproduction (at the editor's discretion).

Rapid publication
Development now offers rapid publication (average 9 weeks from acceptance): the following criteria apply:
(i) the revised manuscript is accompanied by a corresponding word-processor disk
(ii) no colour plates
(iii) author does not require to see proofs
(iv) 200 free reprints only
(v) manuscript conforms to journal style i.e. no subediting necessary – see Information for contributors.
(vi) Figures are labelled in journal style.

Number of issues
Development in 1992 will have 12 normal issues and 1 casebound supplement. The 12 normal issues will be in the form of 3 volumes (114, 115, 116) each of 4 parts. In 1992 the Supplement will be 'Gastrulation' edited by Claudio Stern.

Orders
Orders for 1992, which can be in £ Sterling/Dollars or using Access/Visa credit cards, should be sent to Portland Press Ltd, PO Box 32, Commerce Way, Colchester CO2 8HP, UK [telephone Colchester (0206) 46351; 24-hour ordering by Fax (0206) 549331 – USA 44 206 549331] or to your normal agent or bookseller. Orders must be accompanied by payment.

Delivery
Copies of the journal for subscribers in the USA and Canada are sent by air to New Jersey for delivery with the minimum delay (second class postage paid at Rahway, NJ and at additional mailing offices).

Postmaster (USA mailing only)
Send address corrections to Development, c/o Mercury Airfreight International Inc., 2323 Randolph Avenue, Avenel, New Jersey 07001, USA (US Mailing Agent).

Reagents
Publication of a paper in this journal implies that authors will make available specialized reagents (for example antibodies, DNA probes) to other scientists in the field who require them for bona fide purposes.
For detailed instructions to authors, please see back cover.

Subscription rates
USA, Canada and Mexico: Institutional US$1005; Individual US$135.
Rest of the World: Institutional £585; Individual £92.
(All prices include post and packaging).

Back volumes
Please contact Portland Press Ltd for prices.

Copyright and reproduction
(i) Authors may make copies of their own papers in this journal without seeking permission from The Company of Biologists Limited, provided that such copies are for free distribution only: they must not be sold.
(ii) Authors may re-use their own illustrations in other publications appearing under their own name without seeking permission.
(iii) Specific permission will not be required for photocopying copyright material in the following circumstances.
(a) For private study, provided the copying is done by the person requiring its use, or by an employee of the institution to which he/she belongs, without charge beyond the actual cost of copying.
(b) For the production of multiple copies of such material, to be used for bona fide educational purposes, provided this is done by a member of the staff of the university, school or other comparable institution, for distribution without profit to student members of that institution, provided the copy is made from the original journal.
(iv) For all other matters relating to the reproduction of copyright material written application must be made to Dr R. J. Skaer,
Company Secretary,
The Company of Biologists Limited,
Austin Building,
University of Cambridge,
Pembroke Street,
Cambridge CB2 3ED, UK.
**INFORMATION FOR CONTRIBUTORS**

### Manuscripts

Send to: Development Editorial Office, Austin Building, Room S-14, University of Cambridge, Pembroke Street, Cambridge CB2 3ED, UK. Tel: (0223) 311789 or direct to one of the editors.

USA papers should be sent direct to: Dr D. Melton, Department of Biochemistry and Molecular Biology, Harvard University, 7 Divinity Avenue, Cambridge, MA 02138, USA.

Dr G. Rubin, Department of Molecular and Cell Biology, Box 539, LSA Building, University of California, Berkeley, CA 94720, USA, or Dr T. Jessell, Center for Neurobiology and Behavior, Columbia University, 722 West 168th Street, New York, NY 10032, USA.

European papers can be sent to: Dr W. J. Gehring, Department of Cell Biology, Biozentrum, University of Basel, Klingelbergstrasse 70, CH-4056, Basel, Switzerland.

Manuscripts should be in English, typewritten, double spaced, on one side of the paper, and the pages numbered. Papers should be fully ready for press, since revision in proof will not be possible. The author is requested to provide three copies of the typescript and figures, and should keep a copy.

### Author's disks

Development can use author's word-processor disks (5½ and 3½") instead of rekeying accepted articles. This increases both the speed and accuracy of proof production. With your letter of provisional acceptance, you will be sent full instructions on formatting and saving your manuscript on disk. Please send a copy of your disk with 2 printed copies of your final revised manuscript. Disks will be returned.

### Colour plates

These can be reproduced free of charge at the discretion of the editor. Any charge for excessive use of colour will also be at the editor's discretion.

### Layout and style

A short title of not more than 40 characters, for use as page headings, should be supplied and at least 3 key words for indexing papers.

A summary must be provided at the beginning of the text. It should not exceed 500 words. Acknowledgements should be placed before the list of references.

The list of references must be given in alphabetical order of author's names. The titles of journals should be abbreviated in accordance with the American National Standard. The following style is used:

Citations in the text are given in the following form: Jones and Smith (1960) or (Jones and Smith, 1960). Where there are more than two authors citations should be in the form (Jones et al., 1960). Where more than one paper by the same author(s) have been published in the same year they are cited as Jones (1960a), Jones (1960b) etc.

Unpublished observations, including results submitted for publication, should be cited as such in the text only, and not in the reference list. Personal communications, i.e. the unpublished observations of other scientists, will only be published when substantiated by written permission.

### Text figures/photosgraphs

These should be numbered in a single series (Fig. 1, Figs 2, 3 etc), in the order in which they are referred to in the text. Legends for all illustrations should be typed together, separately from the main text. Authors should submit three copies for reviewers. Copies of the photographic plates must be of suitable standard for reviewers to judge the quality of the work; photocopies are not acceptable. Original figures should be kept by the author until the manuscript has been accepted for publication.

Text figures and photographs ideally should be at final size and occupy either 1 or 2 columns. The maximum printed size for illustrations is 210 mm × 168 mm for a whole page or 210 mm × 81 mm for a single column.

Labelling should be inserted by the author and should conform to journal style and size. Figure parts should be labelled in upper case and lettering on the plates should be in lower case. Magnification should be indicated, where relevant, by a scale line on the illustration. Each illustration should have the name of the author and the figure number written on the back, together with indication of orientation and any proposed reduction in size. If line drawings are produced by computer, please supply a file of these on disk together with your text.

### Proofs

Authors will receive one set of proofs, which should be corrected and returned to the Editorial Office (a photocopy should be made and retained by the author). Authors may be required to pay for alterations in proof other than those needed to correct printer's errors.

### Copyright

In order to give The Company of Biologists Limited authority to deal with matters of copyright, authors will be required to assign to them the copyright of any article published in the journal.

### Tables

Please submit on separate sheets together with their titles and legends.

### Reprints

Authors will receive 200 reprints free of charge and may order additional copies when proofs are returned.
BRITISH SOCIETY FOR DEVELOPMENTAL BIOLOGY & BRITISH SOCIETY FOR CELL BIOLOGY
SPRING MEETING
UNIVERSITY OF SUSSEX 7TH-10TH APRIL 1992

GASTRULATION SYMPOSIUM
Wolpert (London), Ettenson (Pittsburgh), Jeffrey (Bodega Bay),
Trinkhaus (Yale), Keller (Berkeley), Bortier (Ghent), Vakaet (Ghent),
Beddington (Edinburgh), Lawson (Utrecht), Rutishauser (Case Western),
McClay (North Carolina), Wylie (Cambridge), Waelsch (New York),
Leptin (Tubingen), Fleming (Southampton), Brown (London),
Warner (London), Slack (Oxford), Smith (London), Stern (Oxford),
Gurdon (Cambridge), Bate (Cambridge), Raff (Bloomington), Ho
(Oregon), Thiss (Strasbourg), Doniach (Berkeley), Durston (Utrecht),
Dodd (New York)

TRANSCRIPTON FACTORS SYMPOSIUM
Baltimore (New York), Roeder, (New York), Bird (Edinburgh),
Busselinger (Vienna), Engel (Evanston), Felsenfeld (Bethesda), Graf
(Heidelberg), Gruss (Gottingen), Jackle (Gottingen), Krause (Seattle),
Levine (San Diego), Lohnes (Strasbourg), Mohun (London), Nasmyth
(Vienna), Schaffner (Zurich), Schibler (Geneva), Schutz (Heidelberg),
R. White (Cambridge)

NEMATODE DEVELOPMENT: Sulston (Cambridge), J. Thierry-Mieg
(Montpellier), La Volpe (Naples), Plasterk (Amsterdam), Schierenberg
(Cologne), Hope (Leeds), J. White (Cambridge), Schnabel (Tubingen),
Hodgkin (Cambridge), D. Thierry-Mieg (Montpellier)

ACTIN BINDING PROTEINS: Condeelis (New York), Matsudaira
(Boston), Weeds (Cambridge), Pollard (Baltimore), Hall (London),
Schleicher (Martinsreid)

TELEOST DEVELOPMENT: Schartl (Freibourg), Vielkind (Vancouver),
Timmermans (Wageningen), Kimmel (Oregon), Schulte (Tubingen),
Fjose (Bergen), Jowett (Newcastle), Wilson (London), Maclean
(Southampton)

KINASES AND PHOSPHORYLASES: Waterfield (London), Courtneidge
(Heidelberg), Parker (London), Cobb (Dallas), Woodgett (London),
Tonks (New York), Hemmings (Basel), Cohen (Dundee)

SIGNAL TRANSDUCTION: Gallione (Oxford), Otte (Utrecht), Green
(London), Runyan (Iowa), Muller (Heidelberg), Livingstone (Berkeley)

TUMOUR PROMOTERS: Hastie (Edinburgh), Wyllie (Edinburgh), Barrett
(Bethesda), Dutrillaux (Paris)

FOR FURTHER INFORMATION CONTACT:
Dr. Robert Whittle or Dr. Sandy MacGillivray,
School of Biological Sciences, Biology Building, University of Sussex,
Falmer, Brighton BN1 9Q
Fax: 0273 678433
MOLECULAR GENETICS OF DEVELOPMENT

Sponsored by the National Institute for Child Health and Human Development

Organized by Igor Dawid, Arthur Levine and Heiner Westphal

Airlie Conference Center, Airlie, Virginia

May 13 to 16, 1992

Speakers:

David Anderson    Milan Jamrich    Ariel Ruiz i Altaba
Martin Chalfie    Jim Kennison    Gary Ruvkun
Nam Chua          Andrew Lumsden    Tom Sargent
Igor Dawid        Kathleen Mahon    Jim Smith
Eddy De Robertis  Elliot Meyerowitz    Monte Westerfield
Gregg Dressler    Juan Modolell    Heiner Westphal
Denis Duboule     Keiko Ozato    Robert White
Peter Gruss       Luis Parada    Alan Wolffe
Rudolf Jaenisch   Paul Patterson    Carl Wu

A POSTER SESSION will be held. If you wish to participate, please contact Igor B. Dawid, NIH, NICHD, LMG, Bldg. 6, Room 408, 9000 Rockville Pike, Bethesda, MD 20892, Phone (301) 496-4448; FAX (301) 496-0243.

There is no registration fee, but participants must make their own confirmed room reservations with the Airlie Conference Center before February 13, 1992. For details on rooms reservation and other administrative matters contact Kathy Shoobridge at the NIH address.
EMBRYOLOGY:
Cell Differentiation and Gene Expression in Early Development
June 20- July 31, 1992

An advanced course for 24 graduate students, postdoctoral fellows, and other research scientists who seek a current treatment of major issues in the experimental analysis of developmental biology of the embryo, and the diverse intellectual approaches now useful in this field. Limited to 24 students.

Many different embryonic systems will be considered, both terrestrial (e.g. nematode, insect, amphibian, and chick) and marine (e.g. echinoderm, ascidian, and gastropod mollusc). There will be four modules. Each module will consist of lectures from course faculty and other invited speakers, discussions, and laboratories. The modules will be as follows:

I. Cell specification in embryonic forms. Faculty: Eric H. Davidson, Paul W. Sternberg, J. Richard Whittaker. II. Transcription level regulation in embryos. Faculty: Eric H. Davidson, Michael Levine, Steven L. McKnight. III. Cell lineage and morphogenesis. Faculty: Marianne Bronner-Fraser, Scott E. Fraser, David R. McClay. IV. Germ cells, growth factors and cell interactions in development. Faculty: Janet Heasman, Christopher C. Wylie.

DIRECTORS: Eric H. Davidson, California Institute of Technology; Michael Levine, University of California, San Diego; and David R. McClay, Duke University.

FACULTY: Marianne Bronner-Fraser, University of California, Irvine; Scott E. Fraser, California Institute of Technology; Janet Heasman, The Wellcome/CRC Institute, Cambridge; Steven L. McKnight, Carnegie Institution of Washington; Paul W. Sternberg, California Institute of Technology; J. Richard Whittaker, Marine Biological Laboratory; Christopher Wylie, The Wellcome/CRC Institute, Cambridge.

APPLICATION DEADLINE: MARCH 2, 1992
Partial financial aid is available to qualified applicants.

For further information and application forms, contact:
Ms. Florence Dwane, Admissions Coordinator, Marine Biological Laboratory
Woods Hole, MA 02543, USA; (508) 548-3705, ext. 216.
AMERICAN ASSOCIATION OF ANATOMISTS
FORUM IN DEVELOPMENTAL BIOLOGY

Wednesday, March 11
EAC REFRESHER COURSE “What Every Anatomist Wants to Know About Molecular Biology, but is Afraid to Ask” Organizers: Dr. R. D. Specian (Louisiana State Univ. Med. Cntr.) and Dr. K. Svoboda (Boston Univ. Sch. of Med.)

PRESIDENTIAL SYMPOSIUM “Dynamics of Abnormal Development” Organizer: Dr. W. P. Jollie (Virginia Commonwealth Univ.)

Thursday, March 12
EAC SYMPOSIUM “Anatomists and Experimental Gene Therapy” Organizers: Dr. R. Cardell (Univ. of Cincinnati Coll. Med.) and Dr. C. Plopper (Sch. of Veterinary Med., Univ. of California, Davis)

SYMPOSIUM CELEBRATING THE NEW JOURNAL “DEVELOPMENTAL DYNAMICS” “Dynamics of Mechanisms in Morphogenesis” Organizer: Dr. P. Goetinck (La Jolla Cancer Res. Fdn.)

SYMPOSIA “Glucocorticoids and the Nervous System” Organizer: Dr. R. Harlan (Tulane Univ. Med. Sch.); “Intermediate Filaments” Organizers: Dr. T. T. Sun (New York Univ.) and Dr. R. Liem (Columbia Univ.); “Hormonal Control of Behavior” Organizer: Dr. R. S. Cohen (Univ. of Illinois at Chicago); “Cell Adhesion in Morphogenesis” Organizer: Dr. R. Brackenbury (Univ. of Cincinnati Coll. Med.); “Development of Skeletal Muscle Function” Organizer: Dr. S. Herring (Univ. of Washington)

Friday, March 13
CURRENT ISSUES IN SCIENCE “The Ethics of Genetic Screening” Organizer: Dr. R. M. Klein (Univ. of Kansas Med. Cntr.)

ACYA SYMPOSIUM “Neurite Outgrowth” Organizer: Dr. J. A. Garner (USC Sch. of Med.)

SYMPOSIA “Cilia and Centrioles” Organizers: Dr. E. Dirksen (Univ. of California) and Dr. P. Satir (Albert Einstein Coll. of Medicine); “Dendritic Spines as Mediators of Synaptic Activity” Organizer: Dr. R. S. Cohen (Univ. of Illinois at Chicago); “Tissue Interactions/Growth Factors in Morphogenesis” Organizer: Dr. D. Beebe (Univ. Serv. Univ. Health. Sci.); “New Concepts of the Structure of Connective Tissues” Organizer: Dr. R. Mayne (Univ. of Alabama at Birmingham)

Saturday, March 14
CAJAL CLUB SYMPOSIUM “The Role of Glia in Neural Pattern Formation” Organizer: Dr. V. Casagrande (Vanderbilt Univ.)

MORPHOGENESIS CLUB “Patterning Mechanisms” Organizers: Dr. D. Noden and Dr. M. Solursh (Univ. of Iowa)

WORKSHOP “Strategies for Improving National Board Scores in Anatomy” Organizer: Dr. R. Libhin (V.A. Medical Center, & SUNY Health Science Center, Brooklyn) and Dr. I. J. Singh (New York Univ. College of Dentistry)

Sunday, March 15
INNOVATIONS IN ANATOMICAL EDUCATION “Problem-Based Learning: What Does a Changing Curriculum Mean to Anatomists” Organizers: Dr. M. Desmond (Villanova Univ.) and Dr. W. Vogl (Univ. of British Columbia)

SYMPOSIA “Gap Junctions” Organizer: Dr. E. Hertzberg (Albert Einstein Coll. Med.); “The Post-Synaptic Density: Structural, Biochemical and Theoretical Approaches to Function” Organizer: Dr. J. Lisman (Brandeis Univ.); “Cytoskeleton in Morphogenesis and Motility” Organizer: Dr. E. D. Hay (Harvard Med. Sch.); “Current Issues in Cartilage Development” Organizer: Dr. C. Farnum (Cornell Univ.)

For more information apply to:-
Dr. Marilyn L. Zimny, Program Secretary, L.S.U. Medical Center, 433 Bolivar Street, Room 816, New Orleans, LA 70112-2223
What every leading cell biologist is behind

A major international Journal publishing over the whole range of molecular cell biology.
To subscribe, complete and mail the coupon or fax to one of the numbers below.

Journal of Cell Science
Published monthly by The Company of Biologists • Cambridge • UK

SUBSCRIPTION ORDER FORM:

I would like to subscribe to
Journal of Cell Science
for 1992 (please tick appropriate box).

LIBRARY/INSTITUTIONAL SUBSCRIPTION
USA $915 Rest of World £525

INDIVIDUAL SUBSCRIPTION (prepayment required)
USA $515 Rest of World £60

A discount on subscriptions is offered to members of certain societies. Please contact your society if it has made arrangements of this sort.

All orders to Portland Press Ltd (publishers for The Biochemical Society), PO Box 32, Commerce Way, Colchester CO2 8HP, Essex, UK. Tel: Colchester (0206) 46351.

Methods of Payment (please complete as appropriate)

Keep up to date with BioEssays

Published monthly, BioEssays covers advances in the fields of molecular, cellular and developmental biology. The journal is short, sharp and full of up to date reviews and discussions on new ideas and discoveries.

To subscribe, complete and mail the coupon or fax to one of the numbers below.

BioEssays is published for the ICSU Press by The Company of Biologists Cambridge • England

SUBSCRIPTION ORDER FORM:
I would like to subscribe to BioEssays for 1992 (please tick appropriate box)
LIBRARY/INSTITUTIONAL SUBSCRIPTION
USA: $215 Rest of World: £120
INDIVIDUAL SUBSCRIPTION (prepayment required)
USA: $75 Rest of World: £47

INFORMATION FOR CONTRIBUTORS

Manuscripts
Send to: Development Editorial Office, Austin Building, Room S-14, University of Cambridge, Pembroke Street, Cambridge CB2 3ED, UK. Tel: (0223) 311789 or direct to one of the editors.
USA papers should be sent direct to: Dr D. Melton, Department of Biochemistry and Molecular Biology, Harvard University, 7 Divinity Avenue, Cambridge, MA 02138, USA,
Dr G. Rubin, Department of Molecular and Cell Biology, Box 539, LSA Building, University of California, Berkeley, CA 94720, USA, or Dr T. Jessell, Center for Neurobiology and Behavior, Columbia University, 722 West 168th Street, New York, NY 10032, USA.
European papers can be sent to: Dr W. J. Gehring, Department of Cell Biology, Biozentrum, University of Basel, Klingelbergstrasse 70, CH-4056, Basel, Switzerland.
Manuscripts should be in English, typewritten, double spaced, on one side of the paper, and the pages numbered. Papers should be fully ready for press, since revision in proof will not be possible. The author is requested to provide three copies of the typescript and figures, and should keep a copy.

Author's disks
Development can use author's word-processor disks (5½ and 3½") instead of rekeying accepted articles. This increases both the speed and accuracy of proof production. With your letter of provisional acceptance, you will be sent full instructions on formatting and saving your manuscript on disk. Please send a copy of your disk with 2 printed copies of your final revised manuscript. Disks will be returned.

Colour plates
These can be reproduced free of charge at the discretion of the editor. Any charge for excessive use of colour will also be at the editor's discretion.

Layout and style
A short title of not more than 40 characters, for use as page headings, should be supplied and at least 3 key words for indexing papers.
A summary must be provided at the beginning of the text. It should not exceed 500 words. Acknowledgements should be placed before the list of references.
The list of references must be given in alphabetical order of author's names. The titles of journals should be abbreviated in accordance with the American National Standard. The following style is used:

Tables
Please submit on separate sheets together with their titles and legends.

Reprints
Authors will receive 200 reprints free of charge and may order additional copies when proofs are returned.

Text figures/photographs
These should be numbered in a single series (Fig. 1, Figs 2, 3 etc), in the order in which they are referred to in the text. Legends for all illustrations should be typed together, separately from the main text. Authors should submit three copies for reviewers. Copies of the photographic plates must be of suitable standard for reviewers to judge the quality of the work; photocopies are not acceptable. Original figures should be kept by the author until the manuscript has been accepted for publication.

Text figures and photographs ideally should be at final size and occupy either 1 or 2 columns. The maximum printed size for illustrations is 210 mm x 168 mm for a whole page or 210 mm x 81 mm for a single column. Labelling should be inserted by the author and should conform to journal style and size. Figure parts should be labelled in upper case and lettering on the plates should be in lower case. Magnification should be indicated, where relevant, by a scale line on the illustration. Each illustration should have the name of the author and the figure number written on the back, together with indication of orientation and any proposed reduction in size. If line drawings are produced by computer, please supply a file of these on disk together with your text.

Proofs
Authors will receive one set of proofs, which should be corrected and returned to the Editorial Office (a photocopy should be made and retained by the author). Authors may be required to pay for alterations in proof other than those needed to correct printer's errors.

Copyright
In order to give The Company of Biologists Limited authority to deal with matters of copyright, authors will be required to assign to them the copyright of any article published in the journal.
