In this issue, Development's annual Book Review section covers a broad range of topics that are becoming increasingly important to developmental biologists, ranging from imaging and mathematical models, to epigenetics and stem cell biology. See Book Reviews on pp. 5269-5277.
5369 FGF8 is essential for formation of the ductal system in the male reproductive tract

5379 The peripheral nervous system supports blood cell homing and survival in the Drosophila larva
Makhijani, K., Alexander, B., Tanaka, T., Rulifson, E. and Brückner, K.

5393 Msx1 and Msx2 promote meiosis initiation

5403 Dual embryonic origin of the mammalian otic vesicle forming the inner ear
Freyer, L., Aggarwal, V. and Morrow, B. E.

5415 Rho GTPase controls Drosophila salivary gland lumen size through regulation of the actin cytoskeleton and Moesin
Xu, N., Bagumian, G., Galiano, M. and Myat, M. M.

5429 Neural tube patterning by Ephrin, FGF and Notch signaling relays
Stolfi, A., Wagner, E., Taliaferro, J. M., Chou, S. and Levine, M.

5441 Neural crest specification by noncanonical Wnt signaling and PAR-1.
Ossipova, O. and Sokol, S. Y.

TECHNICAL PAPER

5451 pTransgenesis: a cross-species, modular transgenesis resource
