Contents

ZIEMERMAN, B., SCHLARACH, E. and KAATZ, R. Cell contact and surface coat alterations of limb-bud mesenchymal cells during differentiation 1–18

FAWKETT, J. W. and GAZE, R. M. The retinotectal fibre pathways from normal and compound eyes in Xenopus 19–37

NOGUCHI, M., NOGUCHI, T., WATANABE, M. and MURAMATSU, T. Localization of receptors for Dolichos biflorus agglutinin in early post implantation embryos in mice 39–52

MOODY-CORBETT, F. and COHEN, M. W. Increased adhesiveness at sites of high acetylcholine receptor density on embryonic amphibian muscle cells cultured without nerve 53–69

FERNÁNDEZ, J. and STENT, G. S. Embryonic development of the hirudinid leech Hirudo medicinalis: structure, development and segmentation of the germinal plate 71–96

VAN BLERKOM, J., JANZEN, R. and RUNNER, M. N. The patterns of protein synthesis during foetal and neonatal organ development in the mouse are remarkably similar 97–116

MASUI, T. Intestinalization of the area-vitellina endoderm cultured in association with digestive-tract mesenchymes 117–124

WISE, L. D. and SCOTT, W. J. Incorporation of 5-bromo-2'-deoxyuridine into mesenchymal limb-bud cells destined to die: relationship to polydactyly induction in rats 125–141

CHRISTENSEN, K. and MERRIAM, R. W. Insensitivity to cytochalasin B of surface contractions keyed to cleavage in the Xenopus egg 143–151

LEWIS, N. E. and ROSSANT, J. Mechanism of size regulation in mouse embryo aggregates 169–181

KLING, J. Germ line of Tetrodontophora bielanensis (Insecta, Collembola). Ultrastructural study on the origin of primordial germ cells 183–195

LAWRENCE, P. A. and JOHNSTON, P. Cell lineage of the Drosophila abdomen: the epidermis, oenocytes and ventral muscles 197–208

IBRAHIM, L. and WRIGHT, E. A. A quantitative study of hair growth using mouse and rat vibrissal follicles. I. Dermal papilla volume determines hair volume 209–224

CIMA, C. and GRANT, P. Development of the optic nerve in Xenopus laevis. I. Early development and organization 225–249

CIMA, C. and GRANT, P. Development of the optic nerve in Xenopus laevis. II. Gliogenesis, myelination and metamorphic remodelling 251–267

LAING, N. G. Motor projection patterns to the hind limb of normal and paralysed chick embryos 269–286
