RASTAN, S. Non-random X-chromosome inactivation in mouse X-autosome translocation embryos – location of the inactivation centre 1–22

OSTROVSKY, D., SANGER, J. W. and LASH, J. W. Light microscope observations on actin distribution during morphogenetic movements in the chick embryo 23–32

ARRAU, J., ROBLERO, L., CURY, M. and GONZÁLEZ, R. Effect of exogenous sex steroids upon the number of germ cells and the growth of foetal oocytes grafted under the kidney capsule of adult ovarioctomized hamsters 33–42

SPIELMANN, H. and ERICKSON, R. P. Normal adenylate ribonucleotide content in mouse embryos homozygous for the $i^{12}$ mutation 43–51

LAING, N. G. and LAMB, A. H. Development and motor innervation of a distal pair of fast and slow wing muscles in the chick embryo 53–66

LAING, N. G. and LAMB, A. H. The distribution of muscle fibre types in chick embryo wings transplanted to the pelvic region is normal 67–82

OSTER, G. F., MURRAY, J. D. and HARRIS, A. K. Mechanical aspects of mesenchymal morphogenesis 83–125

WEST, J. D. and GREEN, J. F. The transition from oocyte-coded to embryo-coded glucose phosphate isomerase in the early mouse embryo 127–140

TAKANO, J. and SUGIYAMA, T. Genetic analysis of developmental mechanisms in hydra. VIII. Head-activation and head-inhibition potentials of a slow-budding strain (L4) 141–168

LOER, C. M., STEEVES, J. D. and GOODMAN, C. S. Neuronal cell death in grasshopper embryos: variable patterns in different species, clutches and clones 169–182

FREEMAN, S. J. and LLOYD, J. B. Inhibition of proteolysis in rat yolk sacs as a cause of teratogenesis. Effects of leupeptin in vitro and in vivo 183–193

HURLE, J. M. and FERNANDEZ-TERAN, M. A. Fine structure of the regressing interdigital membranes during the formation of the digits of the chick embryo leg bud 195–209

KAUFMAN, M. H. Occlusion of the neural lumen in early mouse embryos analysed by light and electron microscopy 211–228

MCDONALD, C. J. and SAMPSON, J. The effects of inhibition of protein glycosylation on the aggregation of Dictyostelium discoideum 229–248

BOWNES, M., BLAIR, M., KOZMA, R. and DEMPSTER, M. 20-hydroxyecdysone stimulates tissue-specific yolk-protein gene transcription in both male and female Drosophila 249–268

SUMMERBELL, D. The effect of local application of retinoic acid to the anterior margin of the developing chick limb 269–289

DEOL, M. S. and TRUSLOVE, G. M. The effects of the pink-eyed unstable gene on the retinal pigment epithelium of the mouse 291–298

MORATA, G., BOTAS, J., KERRIDGE, S. and STRUHL, G. Homeotic transformations of the abdominal segments of Drosophila caused by breaking or deleting a central portion of the bithorax complex 319–341
