

CORRECTION

Correction: PI(4,5)P₂ forms dynamic cortical structures and directs actin distribution as well as polarity in *Caenorhabditis elegans* embryos (doi: 10.1242/dev.164988)

Melina J. Scholze, Kévin S. Barbieux, Alessandro De Simone, Mathilde Boumasmoud, Camille C. N. Süess, Ruijia Wang and Pierre Gönczy

There was an error in Development (2018) **145**, dev164988 (doi: 10.1242/dev.164988).

It was brought to the authors' attention that cortical structures bearing GFP::PH^{PLC181} have been reported in Nakayama et al., 2009 (Figure S7). The authors apologise for not having been aware of this and, therefore, for not having referred to that report in their recent publication.

Nakayama, Y., Shivas, J. M., Poole, D. S., Squirrell, J. M., Kulkoski, J. M., Schleede, J. B. and Skop, A. R. (2009). Dynamin participates in the maintenance of anterior polarity in the *Caenorhabditis elegans* embryo. *Dev. Cell* **16**, 889-900.

The authors apologise to readers for this mistake.
